The Asia Meeting on Environment and Electrical Engineering (EEE-AM 2023) is part of the established annual International Conference on Environment and Electrical Engineering (IEEE EEEIC) series and will be organized for the first time in Asia in the beautiful and dynamic city of Hanoi, Vietnam, during 13<sup>th</sup> to 15<sup>th</sup> of November 2023. This year's Asia edition of the Conference will focus on the theme "Accelerating the Energy Transition" and will serve as an international forum for the exchange of research, innovations, and development in energy and power systems. The ever-increasing environmental concerns and the intensive international efforts to reduce emissions of greenhouse gases stimulate involved stakeholders to offer their best contributions to accelerate the global energy transition. EEE-AM 2023 provides a unique opportunity for academic researchers to interact with experts from industrial manufacturers and energy utilities and to discuss a wide range of topics related to energy systems and environmental issues. This forum highlights values from cross-continental collaborations in enabling renewable energy diversification and sustainable development.

2023 EEE-AM is technically co-sponsored by IEEE and EMCS and PES, and fully sponsored by IAS. Accepted and presented papers are submitted to IEEE Xplore and will also be submitted for indexing through INSPEC®, EI's engineering information index, COMPENDEX®, and ISI Thomson's scientific and technical proceedings®, ISTEP®/ISI proceedings. The Conference proceedings will be indexed by Scopus. Accepted and presented papers will be considered for IEEE Transactions on Industrial Applications.
